

MEASURES
COVID-19

Launch a new commute service
for employees in just 72 hours

Disinfection before each service,
Limited capacity, usage tracking
and cancellation within
24 hours

BUSUP[®]

#SMARTCOMMUTING

Worldwide reference in shared corporate mobility services

COMMITMENT TO YOUR EMPLOYEE'S HEALTH

URGENCY TO GET BACK TO WORK

Your company needs to recover its activity quickly, for this, your employees need to get back to the office.

HIGH RISK OF CONTAGION

Your employees will face severe restrictions on mobility and an increased risk of contagion in mass transportation solutions.

We know the impact that COVID-19 can have on the health of your employees and the consequent loss of productivity of your Company.

30 days of work leave

Approximately 15 days of illness + 15 days of quarantine.

For this reason, at BusUp, we are taking all measures to minimize the risk of contagion during commute to work.

COMPANY PRESENTATION

World reference in corporate shared commute transport services for employees

WEB/APP for users : Company platform : Providers platform : Drivers APP

VALUE PROPOSITION

Complete outsourcing of the commute services, and a business model based on efficiency

SERVICE MANAGEMENT

**Comprehensive corporate transport
management service**

We take care of everything: customer service, day-to-day operations and incidents management, suppliers outsourcing and reporting so that your company only cares about what really matters for your business

CONTROL OPERATIVO

**Management system for both
clients and operators**

Complete digitization of the transport service that guarantees maximum traceability and transparency to clients, users and transport operators. Thanks to our advanced technological platform, we can offer your company full control of the operation, online and real-time visibility of the status and occupation of routes, position of the Bus or passenger list

COST REDUCTION

**Route optimization and
bus sharing technology**

We optimize costs by continuously analyzing the mobility needs of your company and thus keep routes optimized. We improve the occupation of the bus and reduce its monthly cost by looking for nearby companies with which to share in service.

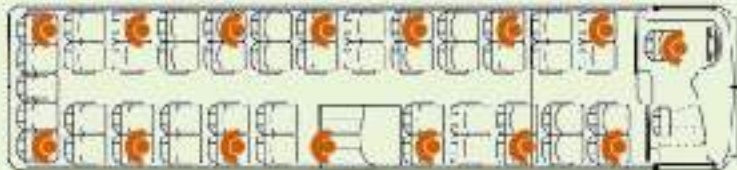

PREVENTION MEASURES AND SANITIZATION

Strict cleaning protocols between routes, safety distance between employees and traceability of use

PREVENTION PROTOCOL

- Bus capacity control (6 feet of distance between passengers – optional)
- Boarding control without direct contact
- Daily check list for drivers of symptoms described by the health authorities before starting the day

SANITIZATION PROTOCOL

- All drivers equipped with personal protective equipment (masks and gloves)
- Disinfection between each services
- Vehicle cleaning record sheet
- Hand sanitizer and gloves for passengers

companies routes

Simply pay for what you need
Without starting a dedicated service

COMMITMENT TO OUR ENVIRONMENT

Modern companies look for sustainable mobility solutions, not only because they care about the well-being of their employees, but also because they care about the environment.

82% reduction of CO2 emissions

With BusUp you can reduce your employees commute CO2 emissions by 82%,
(on average 1 bus = 33 cars off the road)

WHAT THEY SAY ABOUT US

The most valued solution by companies

CONTROL AND FLIBILITY

"It gives us greater control and greater flexibility for both the Company and our employees."

COST REDUCTION AND ROUTES AVAILABILITY

"BusUp is very good for us in terms of cost and routes availability because we can use other companies routes just as they use ours."

QUALITY OF SERVICE

"What made the difference for us was the response speed. They are always available."
